EXPERIENCE

Backend Engineer

Tajrobeh

 03/2024 - 03/2025  Tehran (Remote)

- Developed microservices-based applications improving scalability and maintainability
- Optimized API response times, reducing latency by 30%
- Integrated RabbitMQ for asynchronous processing, improving system responsiveness
- Implemented Redis caching, reducing database load and improving performance
- Designed and secured authentication with JWT, enhancing API security
- Automated deployments with CI/CD pipelines, ensuring fast and reliable updates

Full-Stack Wordpress Developer

Optilink Solution

 04/2024 - 01/2025  Cyprus (Remote)

- Developed custom WordPress solutions using PHP, WP-CLI, and REST API
- Integrated Azure server data, automating product synchronization
- Optimized website performance, reducing load times by 40%
- Implemented SEO best practices, improving search engine rankings

Full-Stack Wordpress Developer

Experiential Life Center (ELC)

 06/2023 - 03/2026  Tehran (Remote)

- Developed a custom user role system, improving platform security and user access
- Created a SOAP API integration, enabling seamless CRM communication
- Enhanced therapist-client interactions, streamlining appointment management
- Tech Stack: PHP, jQuery, HTML, CSS, Bootstrap, WordPress MVC

Full-Stack Developer

Eskano Group

 04/2018 - 02/2023  Gorgan (On-Site)

- Built and optimized high-performance Laravel applications
- Developed custom WooCommerce plugins, enhancing order tracking and UI
- Implemented AI-powered food classification, integrating Laravel with Python
- Key Projects:
 - WooCommerce Tracking Plugin - Order tracking via phone number/ID
 - Digi Tab Plugin - Redesigned WooCommerce dashboard UI
 - Vaslino Plugin - Social media integration for WordPress
 - Keuh Classification (AI) - AI-powered image recognition for food ordering
- Tech Stack: Laravel, PHP, WordPress, JavaScript, Bootstrap, Python, SOAP API

Education

Golestan University – 2021 – 2025

- Bachelor's Degree in Electrical Engineering

SUMMARY

Backend Engineer Backend Engineer with 4 years of experience developing scalable and high-performance web applications. Specializes in Laravel, RESTful APIs, microservices architecture, and database optimization. Skilled in RabbitMQ, Redis, and PostgreSQL for high-availability systems. Adept at troubleshooting, performance tuning, and API integrations. Passionate about building efficient, maintainable code and solving complex engineering challenges.

SKILLS

Backend Development

- Laravel, PHP, RESTful API, SOAP API
- Microservices Architecture, Software Design Patterns
- WordPress (Custom Plugins & Themes), WP-CLI

Messaging & Caching

- RabbitMQ (Message Queues)
- Redis (Performance Optimization & Caching)

Database Management

- PostgreSQL, MySQL, MongoDB
- ORM (Eloquent)

Frontend Development

- JavaScript, jQuery, AJAX
- HTML5, CSS3

Version Control & DevOps

- Git, GitHub, GitLab
- Docker
- Cloud Services: Azure, IBM

Certificates

University of Michigan - 2023

- [Structured Query Language \(SQL\)](#)
- [Building Database Applications in PHP](#)
- [JavaScript, jQuery, and JSON](#)
- [Building Web Applications in PHP](#)
- [Web Applications for Everybody Specialization](#)

IBM- 2023

- [Cloud Computing](#)
- [Git and GitHub](#)
- [DevOps](#)
- [Web Development with HTML, CSS, JavaScript](#)
